

A1

Application Apartments, private houses, villas, passive houses.

Residential air handling units Smarty X with EPP casing are characteristic of the highest energy efficiency (heat recovery rate – up to 94%) and user-friendly control. Universal positioning of Smarty XP units and the lowest height enable to find a place for them even in tight spaces. Due to compact sizing Smarty 2XV ideally fits in a place of a kitchen cabinet, meanwhile Smarty 3XV/4XV could fit above a regular washing machine. Every Smarty unit is tested for airtightness in order to assure exceptional quality of assembly. All internal components (fans, actuators, heat exchanger) are produced by top European manufacturers, which guarantees a long service life.

Description Smart control board enables controlling all components of the ventilation system.

The main features:

- › Class A+/A efficiency*;
- › EC fans with high-efficiency counter-flow heat exchangers;
- › High quality: Class A1 airtightness;
- › Smart and user-friendly handling by using SALDA AIR mobile app (via optional MB-Gateway);
- › Certified by Passivhaus Institute (Smarty 2X and 3X).

*- depends on the unit.

Top class casing:

- › Thermal and acoustic insulation: EPP of 20-30 mm;
- › Galvanized steel plate;
- › The external side is powder-coated – corrosion class C3.

Heat exchanger:

- › Plastic plate heat exchanger;
- › Efficiency up to 91% (EU 1253/2014) / 85% (Passivhaus).

Fans:

- › EC type;
- › Specific fan input (SPI) from 0.26 W/(m³/h);
- › Long lifetime – fans last for more than 10 years.

Motorized bypass damper:

- › 100% summer bypass (night cooling);

Construction

Integrated pre-heater (Smarty 2XV/3XV/4XV version 1.1 only).

Filters:

- › Low pressure drop Coarse 65%/Coarse 65% (G4/G4) filters (effective filtration of dust, pollens);
- › Optional supply of ePM1 70% (F7) filter for more efficient filtration (moulds, spores, microscopic allergens, fine particles, bacteria).

Integrated control board ²:

- › Control of external components: pre-heater, heater, dampers, etc.;
- › Connection for demand control sensors (CO2, RH, presence);
- › Intelligent frost protection;
- › Smart el.heater control 0-10V;
- › Extensive control options: 3 manual modes, boost, calendar, night cooling, fireplace mode and etc.

¹ ~40000 working hours

² Functionality depends on the unit
